

Dear customer,

Thanks to fifty years of market experience, the complex logistic network and the modern storage facilities, the business of Fruttital is mainly oriented to the biggest retail chains.

We deal with all kinds of tropical fruit, both the well know ones, such as bananas, pineapple, mangoes, papaya, avocados, and the most particular ones.

We can supply a wide range of fresh products, such as kiwifruit, citrus, grapes, plums, on a whole year basis, combining local and overseas productions.

As a natural consequence to fifty years as leading player in the fruit business, Fruttital started, last year, a new brand called 'F.lli Orsero' (www.fratelliorsero.it), destined to top quality bananas and pineapples.

Meanwhile, we have arranged a big advertising campaign on national tv, radio and newspaper. You can find, as attachment, a brief summary of our current activities in the Italian market for our brand.

Kindly see below a list of fruit and vegetables we deal with along the year and then some sample pictures of our common commodities.
