PRE-FITTED BOOTH

BOOTH TECHNICAL SHEET

BUILDING SYSTEM PROPERTIES (DIVIDING PANELS AND ACCESSORIES)

- The partition walls and all their accessories are produced using low emission of formaldehyde and CO2 procedures and materials (CARB American certification).
- The materials used are fully recycled and recyclable and no disposable materials have been used.
- Raw material suppliers are selected based on the more advanced technological processes, on their very low environmental impact and in compliance with the European regulations.
- The use of this construction system is of low environmental impact thanks to the transport reduction (it is light, stackable in less space and ready to build).
- Lighting is made using ultra-low LED Strips and Diodes (24V) very low-consumption and very high brightness and durability.
- The high speed of assembly and disassembly guarantees a less waste of resources.
